EAGLE**

SuperEagle Game Litepaper

www.supereaglecoin.co

ABOUT GAME

SuperEagles demand regulatory clarity for all cryptocurrencies and they won't be stopping their demonstrations till they get it. Build your nests and roost your SuperEagles in this revolutionary idle NFT generation game on the XRP ledger (XRPL).

Owning at least two SuperEagles allows you to generate BabyEagle NFTs which will carry on the future fight for fair and sensible regulation for cryptocurrencies. Staking your SuperEagles in your nests over time generates SuperEagle Coin (\$SEC) which you can spend in game to afford potions, upgrade your nests and more.

At time of writing there are two proposed NFT protocols on the XRP

1) XLS-14

This is a work-around NFT protocol that is based on issuing the smallest amount of a fungible token to make it functionally indivisible. Our game will read SuperEagle NFTs in this format but not generate any additional XLS-14 NFTs

2) XLS-20

- a) This NFT protocol is being voted on currently by XRPL validators. It requires a change in the underlying codebase of the XRPL but will bring native NFT functionality. We are planning on using this protocol for withdrawing your NFTs once it is available on the mainnet.

Essentially, you'll be able to play and enjoy the game immediately but complete NFT functionality (withdrawing, selling, and trading etc.) will not be available until XLS-20 is made available on the XRPL mainnet. In the unlikely situation that this never occurs we will integrate another NFT system which could include a separate blockchain based on our discretion.

RULES

- Nest your SuperEagle NFTs to generate BabyEagle NFTs

- If you move your SuperEagles from your linked XRP address the breeding time is reset.
- Each BabyEagle is unique and can never be recreated by yourself or another player.
- There will be a cap of the total number of BabyEagles of 100 thousand. At this time all first generation adult SuperEagles will no longer be able to generate any additional BabyEagles.

- Breeding 2 SuperEagles in the base nest will be free

- You can increase your breeding capacity by purchasing nests via the in-game store for \$SEC

- You will be rewarded with \$SEC

based on how many SuperEagles you keep in your nests over time.

- More SuperEagles in more nests equals more daily \$SEC drops to a limit of max 20 SuperEagles at a time when/if all current nests are fully upgraded
- \$SEC rewards for playing the game will be run for (minimum) up to 5 years

TRAITS

Your First Gen Adult SuperEagles have traits that can be passed down to their BabyEagle offspring. There are 6 trait categories for each First Gen Adult SuperEagle

- 1) Background
- 2) Body
- 3) Skin
- 4) Head
- 5) Mouth
- 6) Eyes

In total there are 143 First Gen Adults Traits that can all be presented in your BabyEagles. The background of your adults affect the Egg design of your BabyEagles.

BabyEagles also have 6 traits categories

- 1) Egg
- 2) Body
- 3) Skin
- 4) Head
- 5) Mouth
- 6) Eyes

In total there are 290 unique BabyEagle traits. BabyEagle traits can be divided into 4 categories.

- 1) Inherited traits (143)
 - These are direct presentations of traits inherited from their first gen adult parents
- 2) Secret traits (115)
 - These traits have a chance of occurring when a secret combination of adult traits are bred together
- 3) Custom traits (29)
 - These are BabyEagle traits inherited from our line of custom project based adult SuperEagles
- 4) Potion traits (3)
 - These are traits exclusive to limited run potions available to purchase via the in game store

COMPATIBLE FIRST GEN ADULT SUPEREAGLES

- 1000 Genesis SuperEagles

- Launched in 2021 we were one of the first projects to experiment with NFTs on the XRPL. 10% (100) were minted in the XLS-14 format and auctioned off to buyers in exchange for \$SEC. These 100 will be exchangeable for XLS-20 once it is available. The remaining 90% (900) will be made available after XLS-20 through various NFT XRPL exchanges.

- 1000 Sologenic SuperEagles

- We embraced Sologenic's NFT marketplace, the first on the XRPL using XLS-14 NFTs. We minted 1000 SuperEagles on this platform. They have been available directly via Sologenic or via auctions for \$SEC on our Telegram and Discord groups

- 75 Faucet SuperEagles

- Our faucet was the first one available for a XRPL issued token. To upgrade it to version 2, we sold 75 SuperEagles, where the traits were based on the buyer's XRP addresses. They are in the form of XLS-14 but will be swappable for the XLS-20 version once available on the XRPL mainnet. These are sold out

- 100 Telegram SuperEagles

- We had such a high demand for the faucet SuperEagles where traits are specific to the buyer's XRP address. We decided to mint a limited run of Telegram SuperEagles, named by the fact that our custom Telegram bot can mint an XLS-14 NFT. As of time of writing (August 2022) these are still available for purchase via our website.

- 15 Custom Project SuperEagles

- We have made many friends in our journey and to honor them we have minted a number of Custom Project SuperEagles. They were minted and given to the respective projects in form of the NFT or XRP sold in exchange for them. These each have 1 to 2 special custom traits that can be inherited by BabyEagles.

- In game your SuperEagles will be presented in their pixel art format

NESTS

Nest upgrades will allow players to breed and stake more SuperEagles at once. They will be issued as XLS-20 NFTs (once available on the mainnet) which will allow transfer between addresses as required.

01

Economy Base Nest

- Free for every XRP address
- Can nest 2 First Gen Adult SuperEagles at once

02

Double Story Bird Box

- 1000 \$SEC
- Can nest an additional 4 First Gen Adult SuperEagles
- 1000 available only
- Max 1 per account

03

Triple Nest Pirate Ship

- 2500 \$SEC
- Can nest an additional 6 First Gen Adult SuperEagles
- 500 available only
- Max 1 per account

04

Castle Quad Nest

- 6000 \$SEC
- Can nest an additional 8 First Gen Adult SuperEagles
- 200 available only
- Max 1 per account

CONSUMABLE ITEMS

Consumable items can be bought in game using your \$SEC tokens. These will be XLS-20 NFTs (once available on the mainnet) and can therefore be traded off platform. At launch there will be two potion types available, and we will add more as the game ages.

1) Trait Chooser Potion - For the next BabyEagle born you can choose 1 trait to be guaranteed to be passed down (only 1 potion per BabyEagle)

- 100 \$SEC
- 2500 available only
- Max 10 per account at any one time

2) Lovers Potion - Your next BabyEagle is born 25% quicker (these can stack up to 3x)

- 100 \$SEC
- 2500 available only
- Max 10 per account at any one time

BABYEAGLES

BabyEagles will be minted on XLS-20 once it is available. You'll be able to hold and trade them on XRPL NFT marketplaces. Their traits are inherited from the First Gen Adult SuperEagles parents. There are some secret trait combinations that you'll discover by breeding particular adults together. All the example BabyEagles below contain at least 1 secret trait.

GAME INTERFACE

On launching the game you'll be prompted to connect your XRP wallet via Xumm. If your address has not been used before you will be prompted to make an account. This allows us to contact you about the status of your NFTs, developments etc.

You can only have one XRP address per account

GAME INTERFACE

Your SuperEagle NFTs will be shown in game under the “My NFTs” tab. You can select to nest these NFTs in pairs. Selecting the “Stake” button will confirm your SuperEagle selections and begin the timer. Whilst your SuperEagles are nesting you will receive daily rewards of \$SEC proportional to the total number of SuperEagles staked (see section 10). After the time period has elapsed you’ll receive a BabyEagle based off the traits from your First Gen Adult SuperEagles.

You can reduce this time to generate a BabyEagle by using up to 3 Lovers Potions

SUPEREAGLE GENERATIONS

Generation 1)

First Gen Adult SuperEagle

Generation 2)

BabyEagle

This BabyEagle has inherited the fireman helmet and gem eyes from parent First Gen Adult SuperEagle 826s whilst locked beak and pink eggshell are from First Gen Adult SuperEagle 39

BabyEagle egg colors are based your First Gen Adult SuperEagle background colors

Generation 3)

Coming soon!

3D Avatar Adult Versions of your BabyEagles

We are developing a time machine mechanism to age your favorite BabyEagles to Adult 3D Avatars

PLAY&EARN REWARDS

Each 24 hours you nest your First Gen Adult SuperEagle you'll receive \$SEC rewards for playing proportional to how many you have in nests (up to a max of 20) for a minimum 5 years. You will receive your rewards drops on a daily basis directly dropped into your XRP wallet.

Eagles Staked	\$SEC Rewards
1	0.5 \$SEC per day (Free Economy Base Nest)
2	1 \$SEC per day (Free Economy Base Nest)
3	2 \$SEC per day (requires at least Double Story Bird Box upgrade)
4	3 \$SEC per day
5	5 \$SEC per day
6	7 \$SEC per day
7	10 \$SEC per day (requires at least the Triple Nest Pirate Ship upgrade)
8	13 \$SEC per day
9	17 \$SEC per day
10	21 \$SEC per day
11	25 \$SEC per day
12	29 \$SEC per day
13	34 \$SEC per day (requires at least the Castle Quad Nest upgrade)
14	39 \$SEC per day
15	45 \$SEC per day
16	51 \$SEC per day
17	58 \$SEC per day
18	65 \$SEC per day
19	73 \$SEC per day
20	81 \$SEC per day

MISCELLANEOUS

SECWarriorClub was the first NFT we issued on the XRPL. Holding at least 1 SECWarriorClub NFT in you XRP wallet attached to the game will give you 10% off in store item purchases.

FAQ

Q) How & when will I receive my BabyEagle?

A) As soon as your BabyEagle is generated you will receive it in the application. However, you will not be able to withdraw them till XLS-20 is available on the XRPL mainnet.

Q) How & when will I receive my \$SEC coin passive income?

A) You will receive your \$SEC rewards daily to your connected XRP address. You will have to be actively nesting/staking your SuperEagles to receive these rewards.

Q) Do I have to have my SuperEagles in nests to receive passive income or can they just be in my wallet?

A) Only SuperEagles being nested will be counted towards \$SEC daily rewards. Just having SuperEagles in your wallet is not enough.

Q) Consumables (NFTs), bought in-game, where are they stored?

A) Initially in-game items bought will be in your inventory only. When XLS-20 is available you will be able to withdraw these items as tradable NFTs.

Q) Where do I locate the game, Web or app?

A) The game will initially be a web application only however we will be looking to make it available on the iTunes and Google Play mobile application stores.

Q) Can I see my BabyEagle hatch live?

A) Your BabyEagles will hatch when available in real time however what traits they have can only be viewed in your Inventory/Rewards section.
